S. Osmalov

ow Alkaloid Cigarette 3Al for the University of Kentucky

Attached for your information is a letter from Dick Barbella of the University of Kentucky regarding production of the 3Al low alkaloid cigarette. Please note that the production date will be targeted for late 1975 or early 1976. A new cost estimate based on production of 1.1 million cigarettes needs to be generated and transmitted to the University of Kentucky for approval. By copy of this memo to Wayne Saunders. I am requesting that such a new cost estimate be prepared taking into account the reduced number of cigarettes (originally five million) and possible labor and material cost. increases which may occur either at the end of this year or early next year.

3 (Could If you have any questions, please let me know.
